

Narrow Footshape

Size: Men's 7 / Women's 9

Finding Your Fit

With minimalist sandals, you want a close fit that matched your foot shape. We recommend printing a few sizes and shapes to determine which is best for you.

Place the paper on a hard surface and stand, centering your foot within the lines of the shape.

The fit should be close. Recommended about 1/8" in front of your toes and behind your heel. Some people may prefer slightly more, some slightly less.

Huarache style only: verify the toe plug is centered between your first and second toes, and is almost up against the skin between the toes.

Duo style only: We will widen the forefoot on the Duo sandals slightly to accommodate the strap thickness.

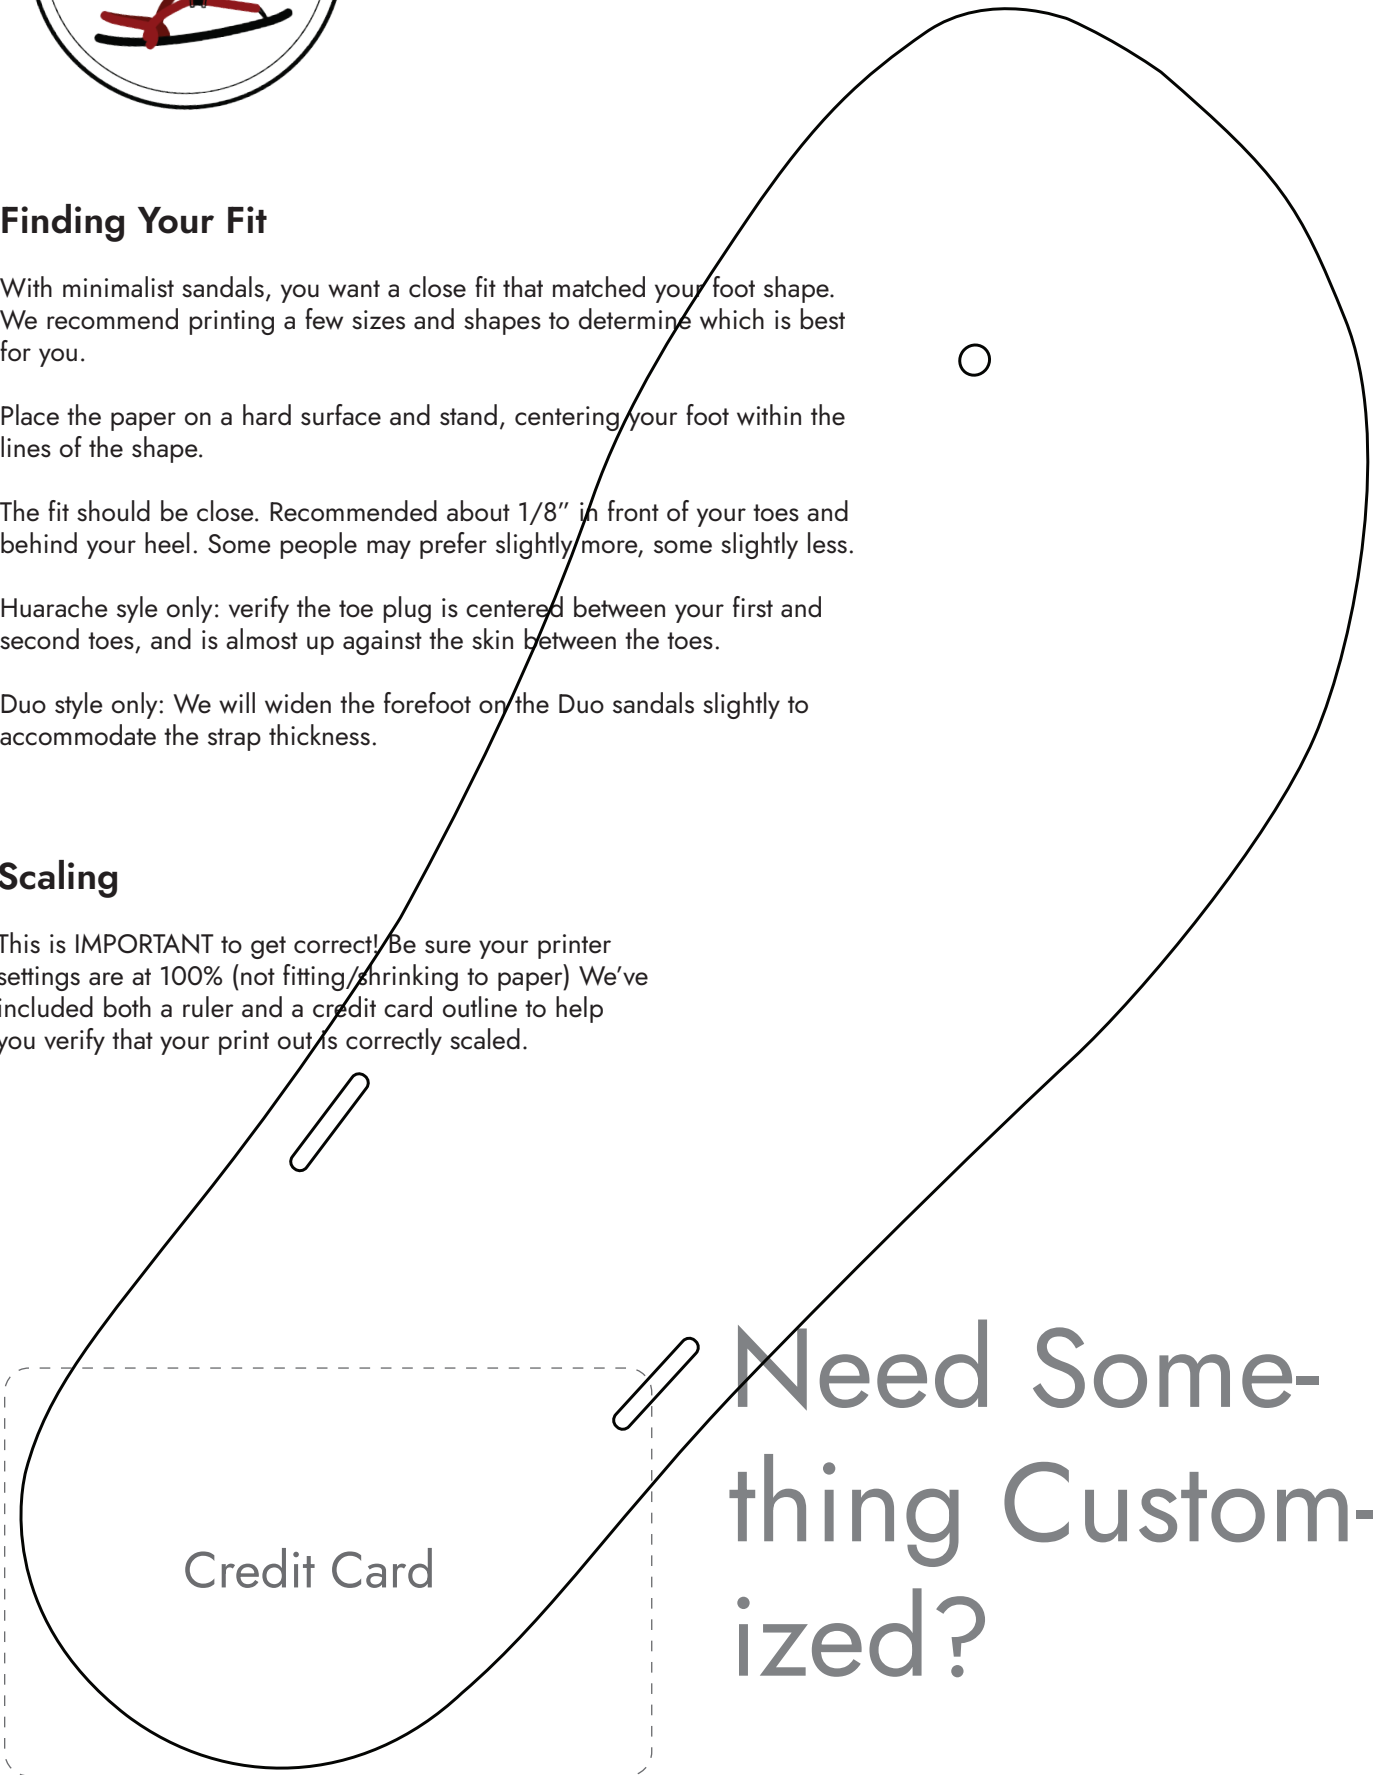

Scaling

This is IMPORTANT to get correct! Be sure your printer settings are at 100% (not fitting/shrinking to paper) We've included both a ruler and a credit card outline to help you verify that your print out is correctly scaled.
